

Type YA DEFLECTION YOKE

FOR 7/8" NECK CRTs

The type YA Yoke series is for 52°, 70° and 90° CRTs and is designed to eliminate borderline neck shadow and glass envelope interference problems. The yoke contains a special High Q core with good sensitivity and is very useful in resonant drive-circuits. All units are available as yoke only, yoke and pincushion corrector and as yoke-pincushion corrector-centering device. Technical information available.
